

A private glass, a public death

CASE: MERIDIAN / OCT 30, 2026 / F1

Certified findings

Grant Larceny died after his private toast at 6:49. Botanical cardiac toxin was wiped inside his silver coupe before the cordial was poured. The glass tested clean when unwrapped at 6:40; food, decanter and pour tested clean. The service dome closed at 6:44, its seal remained intact until the witnessed 6:46 pour, and the glass was then watched through the toast. Contamination therefore occurred between 6:40 and 6:44. The missing conservation reference sample contains the same compound. One attending guest acted alone.

An evening of unfinished business

CASE: MERIDIAN / OCT 30, 2026 / F2

NAMING AGREEMENT

Veto power, museum renaming and management changes.

OBJECTS & PAYMENTS

Disputed title, altered records and unpaid design invoices.

PERSONAL PAPERS

Family trust amendments and threats to professional reputations.

Certified findings

Preparation linen was stocked in the shared supply room. The conservation cabinet key was available during gala setup. Grant's naming agreement, outstanding invoices, trust amendments and disputed accession papers were found among his gala documents.

Private service / movement statement

CASE: MERIDIAN / OCT 30, 2026 / F3

STAR BOWL ALCOVE

Curtain at entrance

EAST GALLERY / OPEN

Balcony overlooks display

Donor Salon lies outside this gallery

- 6:40** Clean empty coupe delivered to Donor Salon.
- 6:44** Service dome sealed and continuously watched.
- 6:46** Seal checked; cordial poured for the first time.
- 6:49** Grant drinks from his private coupe.

Certified findings

The Donor Salon camera was disconnected on Grant's signed order. Staff delivered the clean coupe at 6:40 and sealed its transparent service dome at 6:44. The numbered seal was watched until the 6:46 pour. The glass remained in view through the 6:49 toast. The service log records no substituted glass or broken seal.

Installation inspection / S-2

CASE: MERIDIAN / OCT 30, 2026 / F4

6:37 S-2 / mounting alert received.

6:38 S-2 / curtain locked / interior sealed.

7:00 First reopening permitted.

Certified findings

The mounting alert closed the Star Bowl alcove at 6:38. The curtain remained locked until 7:00. The installed plinth has no sliding-glass cabinet; the cabinet appears only in the superseded proposal. The gallery outside the curtain remained open.

Recording archive / technical log

Inspected interval: 6:39–6:45 SECURITY

Overlay interval: 6:49–6:55 BRASS

Telephone circuits

Boardroom speakerphone • Bid booth • Legal office • Translation booth • Valuation booth • Archive-office radio line

Fixed circuits; forwarding disabled. Live two-way audio throughout the inspected interval. Longest silence: 18 seconds. Each terminal is at least 90 seconds on foot from the Donor Salon.

Access-control logs

Registrar vault • Research cage • Freight lift • Object-study room

Occupied throughout the inspected interval. Doors closed; no secondary exit. Freight cabin stranded between floors. Object-study service panels retain three blue seals. Interior recordings show no interruption.

Audio and video archive

Cash office • Conservation booth • Performance platform • Arts-channel studio • Library broadcast room • Board annex • North checkpoint • Press booth • Lighting rig • Technology stand • Oral-history room • Textile stand • Load-test platform • Style desk • Podcast balcony • Kitchen pass • School-link room • Portrait station • Return desk • Show desk

Original live recordings; no splice, loop or gap in the inspected interval. Wide frames include occupants and exits. Technology glove telemetry and show-desk manual-contact logs agree with their room recordings.

Participant identities and private conversation contents are redacted from this technical inspection. Automatic presentation files and still-photo timestamps are separate archive items.

Two clocks / a contaminated coupe

CASE: MERIDIAN / OCT 30, 2026 / F5

Certified findings

The linen sample and residue inside the coupe contain the same botanical toxin as the missing conservation reference sample. SECURITY timestamps are synchronized. BRASS overlays use the decorative gallery clock, recorded ten minutes fast. At SECURITY 6:39, the gallery clock displayed 6:49. Its setting remained unchanged throughout the gala.
