

Reference room incident notice

MERIDIAN / OCT 30, 2026 / F2

Visitor permission	All gala guests
Missing material	Contents of the sole C-17 vial
Initial action	Room locked; vial preserved

All gala guests were invited to the preparation walkthrough. The shared room and reference cupboard were open to visitors. After the walkthrough, the steward discovered the C-17 reference vial empty and secured the room. The vial and service materials have been preserved for comparison. The inventory discrepancy is being investigated. A missing reference material is not, by itself, a finding about the cause of death.
