

What happened to Grant's glass

6:30 / New donor glass, still wrapped

6:32 / Place set; server returns to kitchen

6:44 / Glass collected on service tray

6:46 / Shared punch poured for the toast

Initial lab finding

Cyanide inside Grant's glass

Shared punch and food

No cyanide detected

Grant requested the new donor gift glass for his toast. I unwrapped it at 6:32, set his place and returned to the kitchen over the extra course. Guests were circulating through the salon. At 6:44 I collected it on my tray and kept it with me through the 6:46 pour and toast. These photos come from the event photographer's donor-glass coverage. Signed: Service Manager.
